Summary

Computer Science student with a strong interest in software development, Data Structures and Algorithms, and problem solving. Skilled in Python, HTML5, and CSS, with hands-on experience solving algorithmic challenges on LeetCode and currently learning JavaScript to strengthen front-end development skills. Continuously improving knowledge of DSA concepts such as Binary Search, Two Pointers, and Hashing while building a solid foundation in programming and software engineering. Passionate about learning new technologies and developing efficient, real-world solutions.

Technical Skills

Python
HTML5
CSS3
Bootstrap
tailwind css
Flask Web Framework
Data structure and algorithms with using python
object-oriented programming
JavaScript
Git
Github

Projects

My portfolio

June 2026 – Present

- Designed and Developed a responsive portfolio using HTML, CSS bootstrap,tailwind CSS and JavaScript.
- Implemented Navigation between multiple pages.Created sections for about me, projects,skills,and contact information.
- Technologies: **technologies which is used in my portfolio project HTML5,CSS3,Bootstrap,Tailwind CSS and little JavaScript.**

Certifications and Achievements

- Solved more than 90 problems on LeetCode covering two pointer, binary search, array, string, sorting algorithm, sliding window

Education

currently studying semester second in Government polytechnic Darbhanga
Bachelor of Technology in Computer Science and Engineering

2025 – 2028
SGPA first semester: 9.1 out of 10.0
